MESSAGE FROM THE MINISTER

It is my pleasure to make available to you this British Columbia External Trade Report for 1986.

British Columbia relies heavily on foreign markets, regularly exporting about one half of its total goods production. Recognition of the need for information on the volume and distribution of the Province's external trade has resulted in development of a range of foreign trade statistics and reports by this Ministry. The External Trade Report 1986 presents a selection of the latest available statistical information on British Columbia's international trading activities.

If you have any inquiries regarding this report, or any aspects of the external trade of the Province, please contact my staff at the address below:

SOURCE OF STATISTICS: The Statistics in this Report are primarily produced from the records of Canada Customs. Raw data from these records are processed by Statistics Canada and the British Columbia Central Statistics Bureau to produce the tables presented herein.

LIMITATIONS OF THE AVAILABLE STATISTICS:

For exports produced in British Columbia, considerable information is available from the estimates of British Columbia product exports compiled by the Ministry of Economic Development and the statistics on British Columbia origin/lading exports produced by Statistics Canada. For imports, however, the only current statistics available are for Canadian imports passing through British Columbia customs ports. These do not differentiate between goods destined for consumption in British Columbia and those destined for trans-shipment to other provinces.

ESTIMATED BRITISH COLUMBIA PRODUCT EXPORTS: These special tabulations present statistics on exports grown, extracted, or manufactured in British Columbia. British Columbia origin exports can be cleared or laden for export in any part of Canada.

The primary raw data used for producing these estimates are Statistics Canada numbers for B.C. origin/lading exports as presented in Table 18 of this Report. Beginning with these data, the Ministry of Economic Development applies a variety of adjustments and revisions to arrive at the estimates of British Columbia product exports.

These adjustments and revisions involve the following steps:

(a) elimination of products known not to be of British Columbia origin.

(b) addition to the data in cases where it is known that products of British Columbia origin have been designated for export in other parts of Canada, and therefore have not been shown as laden in British Columbia.

(c) whenever possible, revision of quantity and value figures for specific exports which originate both in British Columbia and other parts of Canada to identify only the British Columbia content.

The above adjustments are derived from information provided by various sections of the Ministry of Economic Development,other provincial ministries, Statistics Canada, federal government departments, private and public organizations, and the business community. The Provincial Ministries of Agriculture and Fisheries and Energy, Mines and Petroleum Resources in particular provide valuable data. Because the estimating procedure is not uniformly reliable at the detailed commodity level, publication of the estimates is currently limited to larger commodity groups and selected 5 digit commodities.

B.C. ORIGIN/LADING EXPORTS: These statistics can provide valuable information on detailed commodity by country exports that is not available in the B.C. product export estimates. They must be interpreted with care, however, because they include some exports not originating in B.C. and they exclude some exports of B.C. origin. Since these problems apply to relatively few export commodities, in most cases the data can provide useful indicators of export volume. The major concern is commodities which are handled in bulk and warehoused in B.C. before being exported - for example, grains, oilseeds, sulphur, and various petroleum products. Although few in number, these commodities are important export items.

Prior to January 1984, Revenue Canada requested exporters to note the province in which goods were laden for export, regardless of where their goods were manufactured, grown or extracted. Beginning in January 1984 a new form was introduced requesting exporters to note the province of origin (where manufactured, grown or extracted) instead of the province of lading. The old forms were not completely withdrawn until January, 1987.

The change from lading to origin reporting introduces complications to the interpretation of these statistics. It is difficult to positively identify actual changes in export volume or value between 1984 and 1985 because some of the differences may be due to the way in which the data collection method has been revised. Estimates prepared by Ministry of Economic Development staff suggest that about 70 percent by value of British Columbia origin/lading exports were of B.C. origin in the 1985 data. This proportion has increased to well over 90% in the 1986 data.

CANADIAN IMPORTS AND EXPORTS THROUGH B.C. CUSTOMS PORTS: Canadian Imports and Exports passing through British Columbia customs ports provide useful measures of shipping activity and can sometimes offer reasonable indicators for British Columbia external trade in particular commodities. They may also help identify opportunities for British Columbia exports or import substitutions. Nevertheless, except for a few commodities, they do not provide direct reliable measures of either imports consumed in B.C. or exports originating in British Columbia.

OTHER SOURCES OF INFORMATION: Some statistics relating to particular provinces are available in Statistics Canada publications.

Annual estimates of B.C. origin exports for selected commodities are released in a publication entitled 'Financial and Economic Review' published by the Ministry of Finance and Corporate Relations. Other provincial government publications containing information on external trade are the annual 'British Columbia Industry Review' and 'Facts and Statistics' published by the Ministry of Economic Development.

Additional statistics in extensive detail are available from the Central Statistics Bureau, Ministry of Economic Development.

DOMESTIC EXPORTS: These include both Canadian produced goods and imported goods that have been changed in form through further processing within Canada. Export statistics in this Report reflect 'domestic' exports except where otherwise indicated.

RE-EXPORTS: These are goods previously imported and not changed in form before leaving Canada.

EXPORT EXCLUSIONS: Export statistics exclude the following Non-Trade Special Transactions - settlers' effects; private donations and gifts; identifiable tourist purchases; goods shipped to Canadian diplomatic or military personnel abroad; shipments by foreign representatives and temporary exports for exhibition or competition including films for processing. Separate statistics are maintained for these Special Transactions. Export statistics also exclude bunker supplies and stores for ships and aircraft; temporary exports (other than contractors equipment shown under commodity code 970-20) and goods in transit through Canada.

IMPORTS: These include goods cleared by Customs on arrival in Canada and also goods entered into customs warehouses.

IMPORT EXCLUSIONS: Import statistics exclude settlers' effects; private donations and gifts; goods belonging to foreign representatives or brought back by Canadians returning from foreign postings; and imports for exhibition or competition, including films. Bunker supplies, stores purchased for ships or aircraft, temporary imports or goods in transit through Canada are also excluded.

WEIGHT: Weight, where shown, is the net weight of the goods excluding the weight of covers or receptacles, except for certain goods as provided in the customs tariff.

EXPORT COMMODITY CLASSIFICATION: Export statistics are classified according to the Export Commodity Classification (XCC), which is based on the Standard Commodity Classification (SCC) published by Statistics Canada (catalogue 12-502).

IMPORT COMMODITY CLASSIFICATION: Import statistics are classified according to the Canadian International Trade Classification (CITC) published by Statistics Canada (catalogue 65-502).

COUNTRY OF DESTINATION OF EXPORTS: Exports are classified according to the country of farthest known destination as they leave Canada. Many primary products are shipped to entrepot points for re-export to unknown ultimate destinations.

COUNTRY OF ORIGIN OF IMPORTS: Import statistics in this publication are credited to the country of actual origin. In Statistics Canada publications imports have been generally credited to the country from which goods have been consigned to Canada, except for goods originating in Central or South America but consigned to Canada from the United States. Those goods were credited to the country of actual origin, except for 'Swap Oil' from the United States.

EXPORT VALUATION: Exports are recorded at the values declared on export documents. These usually reflect actual selling price or, for non-arms-length transactions, the transfer price for company accounting purposes. Most exports are valued at the Canadian point (e.g. mine, factory or farm) where they are laden for export. However, a significant proportion of exports by sea or air reflect value at the point of export. Values for some overland shipments to the U.S. may reflect transportation charges to the ultimate destination because these cannot be identified and removed.

IMPORT VALUATION: Imports are generally recorded at values established for Customs duty purposes. Customs values are identical to selling prices for most arms-length transactions. However, Customs values exceed company transfer prices for most transactions between affiliated firms. Import documents are required to show values which exclude all transportation charges. Some imports from the United States are however purchased on a "delivered" basis and their prices therefore reflect an allowance for transportation costs.

QUANTITY: Quantity values are omitted for some items comprising a variety of different commodities (e.g. 'sound amplifiers', or 'dental supplies'). For some items the quantity is not matched exactly to the value. In the item "Engines and Parts" for example, the quantity represents the number of complete engines only, while the value represents not only the value of the specified number of complete engines, but also the value of all kinds of "Parts" of engines; therefore, in this and similar items, the average value per unit cannot be ascertained.

UNITS OF QUANTITY

Abbreviations	Meaning	Abbreviations	Meaning
BBL	Barrels	M C F	Thousand cubic feet

KEY TO FINDING COMMODITIES

In this publication commodities are not listed alphabetically. Rather, they are listed in the sequence used by national trade classification systems. To find a particular commodity, users should refer to the appropriate classification grouping. These are listed below in the sequence by which they appear in the tables.

Commodities can be found by looking through commodity titles for similar products to that being sought. Once the general area in the classification is found, it is usually a simple matter to locate the particular product.

APPLICABLE TO BOTH IMPORTS AND EXPORTS

GENERAL DESCRIPTION	5-DIGIT COMMODITY CODES	GENERAL DESCRIPTION	5-DIGIT COMMODITY CODES
LIVE ANIMALS	00000 to 00999	TRACTORS	55000 to 56999

BRITISH COLUMBIA PRODUCT EXPORTS

NOTE:

British Columbia Product Export estimates are produced by the Ministry of Economic Development to provide information on the export of products of B.C. origin.

Statistics on exports on B.C. 'origin/lading' are available in considerable detail. While the great majority of B.C. origin/lading exports are of B.C. origin, they also include some goods laden in B.C. but not of B.C. origin and exclude some goods of B.C. origin that were laden for export in other provinces.

The estimates of B.C. Product Exports shown in Table 1 provide estimates of the value of B.C. produced goods for about 170 export commodities for which such detail is available on an historical basis.

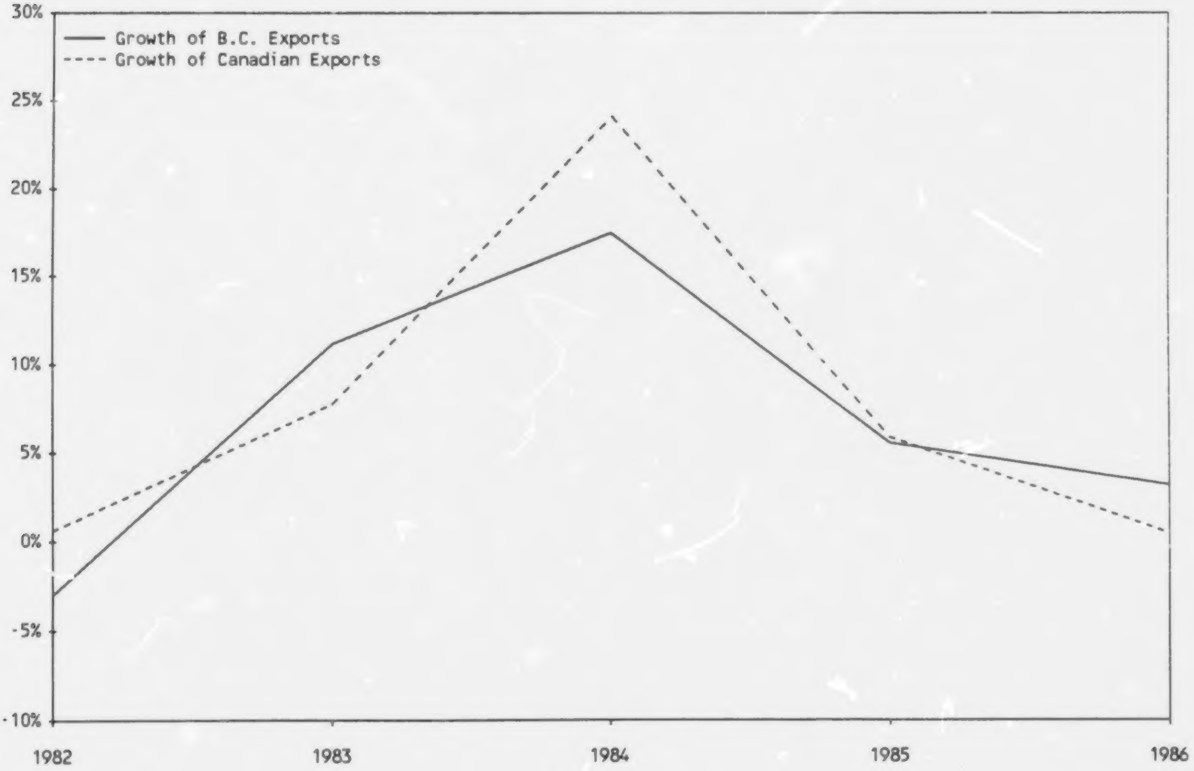
ANNUAL GROWTH IN THE VALUE OF EXPORTS
British Columbia and Total Canada



EXPORTS BY INDUSTRY

NOTE:

Industry export figures as presented in Table 4 refer to B.C. origin/lading exports. While the great majority of B.C. origin/lading exports are of B.C. origin, they also include some exports laden in B.C. but not of B.C. origin and exclude some goods of B.C. origin that were laden for export in other provinces. Exports of purely B.C. origin, presented in Table 1, are not available classified by industry.

The Department of Regional Industrial Expansion (DRIE) concordance referred to in the table title has been used to assign export commodity categories to Standard Industrial Classification (SIC) categories. The export volume shown for a particular industry is determined by the particular export commodities assigned to it.

The DRIE commodity to SIC concordance was originally developed to produce export by industry numbers at the national level. There may be some distortion in applying it to B.C. provincial exports. Also, each commodity is assigned or attributed to a specific industry whereas some commodities may in fact be produced (in lesser amounts) by a number of different industries.

For the above reasons, industry export figures should be viewed only as general estimates.

HIGH TECHNOLOGY EXPORTS

NOTE:

High technology export figures as presented in Table 5 refer to B.C. origin/lading exports. While the great majority of B.C. origin/lading exports are of B.C. origin, they also include some exports laden in B.C. but not of B.C. origin and exclude some goods of B.C. origin that were laden for export in other provinces. Exports of purely B.C. origin, presented in Table 1, are not available for the full range of high technology categories.

The nine high technlogy categories used were originally defined in an Organization for Economic Cooperation and Development (OECD) paper entitled 'International Trade in High Technology Products' (January 1985). These were interpreted by Statistics Canada in terms of the Canadian Export Commodity Classification.

FORESTRY EXPORTS

NOTE:

B.C. forestry exports as presented in Tables 6 through 8 refer to B.C. origin/lading exports. While the great majority of B.C. origin/lading exports are of B.C. origin, they also include some exports laden in B.C. but not of B.C. origin and exclude some goods of B.C. origin that were laden for export in other provinces. Exports of purely B.C. origin, presented in Table 1, are not available for all commodities or by destination.

Exports to United States Census Subdivisions (USCSD) shown in Table 8 do not necessarily always represent the USCSD where goods will be consumed. Many export shipments can only be classified according to their immediate destination in the United States, although they may be transhipped from there to further points. This will apply particularly for exports destined for 'Alaska, Oregon, Washington'.

ALL CANADIAN EXPORT AND IMPORT TRAFFIC THROUGH BRITISH COLUMBIA CUSTOMS PORTS

NOTE:

Canadian imports or exports cleared through B.C. customs ports do not generally provide a very good measure of B.C.'s foreign trade. However, they are useful as indicators of freight traffic movements through the province and as means of identifying possibilities for import replacement.

TABLE 9

VALUE OF CANADIAN EXPORTS, RE-EXPORTS AND IMPORTS CLEARED THROUGH BRITISH COLUMBIA CUSTOMS PORTS, 1949 - 1986

YEAR	EXPORTS				IMPORTS(3)

(1) INCLUDES ALL DOMESTIC CANADIAN PRODUCTS EXPORTED THROUGH BRITISH COLUMBIA CUSTOMS PORTS, IRRESPECTIVE OF PROVINCE OF ORIGIN.

(2) INCLUDES ALL FOREIGN ORIGIN EXPORTS.

(3) INCLUDES ALL PRODUCTS IMPORTED THROUGH B.C. CUSTOMS PORTS.

TABLE 10

VALUE OF CANADIAN EXPORTS PASSING THROUGH BRITISH COLUMBIA CUSTOMS PORTS TEN LEADING COMMODITIES - 1985 & 1986

	VALUE OF EXPORTS 1985 ($,000,000)	% OF TOTAL	VALUE OF EXPORTS 1986 ($,000,000)	% OF TOTAL
COAL	1,965.0	10.3	1,819.4	10.1
WOOD PULP, BLEACHED KRAFT PAPERGRADE, SOFTWOOD	1,046.8	5.5	1,417.1	7.9
NATURAL GAS	2,139.0	11.2	1,370.2	7.6
RED SPRING WHEAT, EXCEPT SEED	1,255.7	6.6	1,056.2	5.9
SULPHUR, CRUDE OR REFINED, N.E.S.	1,152.2	6.0	1,043.2	5.8
NEWSPRINT PAPER	848.2	4.4	905.5	5.0
LUMBER, WESTERN HEMLOCK AND AMABILIS FIR	669.4	3.5	699.4	3.9
LUMBER, SPRUCE, JACKPINE, FIR, N.E.S.	464.2	2.4	547.6	3.1
COPPER IN ORES AND CONCENTRATE	388.2	2.0	456.4	2.5
RAPESEED	543.0	2.8	417.6	2.3
TOTAL ABOVE COMMODITIES	10,471.7	54.9	9,732.6	54.3
TOTAL ALL COMMODITIES	19,084.3	100.0	17,930.9	100.0

THE TOTAL VALUE OF GOODS EXPORTED THROUGH B.C. CUSTOMS PORTS IN 1986 WAS $17,930.9 MILLION, DOWN 6 PERCENT FROM 1985. GAINS IN MAJOR FOREST PRODUCTS AND COPPER CONCENTRATES WERE NOT SUFFICIENT TO OFFSET LARGE DECLINES IN THE VALUE OF EXPORTS OF NATURAL GAS, COAL, AGRICULTURAL PRODUCTS, SULPHUR, POTASH AND ELECTRICITY. BLEACHED KRAFT WOODPULP SHOWED THE LARGEST ADVANCE WITH AN INCREASE OF $370.3 MILLION OR 35 PERCENT, AND NATURAL GAS THE LARGEST DECLINE WITH A DROP OF $768.8 MILLION OR 36 PERCENT. THE TEN LEADING COMMODITIES WERE VALUED AT $9,732.7 MILLION COMPARED WITH $10,471.7 MILLION IN 1985. A NUMBER OF CHANGES OCCURRED IN THE RANKING OF THE TOP TEN COMMODITIES AND POTASSIUM CHLORIDE (POTASH) WAS REPLACED BY COPPER IN ORES, CONCENTRATES AND MATTE.

FOREST PRODUCTS, AMONG 1986'S TOP TEN EXPORTS, HAD A VALUE OF $3,569.6 MILLION IN 1986 COMPARED WITH $3,028.6 MILLION THE PREVIOUS YEAR, UP 18 PERCENT. PRODUCTS OF THE MINERAL INDUSTRY IN THE TOP TEN WERE VALUED AT $4,689.3 MILLION COMPARED WITH $5,644.4 MILLION IN 1985, A DECLINE OF 17 PERCENT.

TABLE 11
VALUE OF CANADIAN IMPORTS PASSING THROUGH BRITISH COLUMBIA CUSTOMS PORTS
TEN LEADING COMMODITIES - 1985 & 1986

COMMODITY	VALUE OF IMPORTS 1985 ($,000,000)	% OF TOTAL	VALUE OF IMPORTS 1986 ($,000,000)	% OF TOTAL

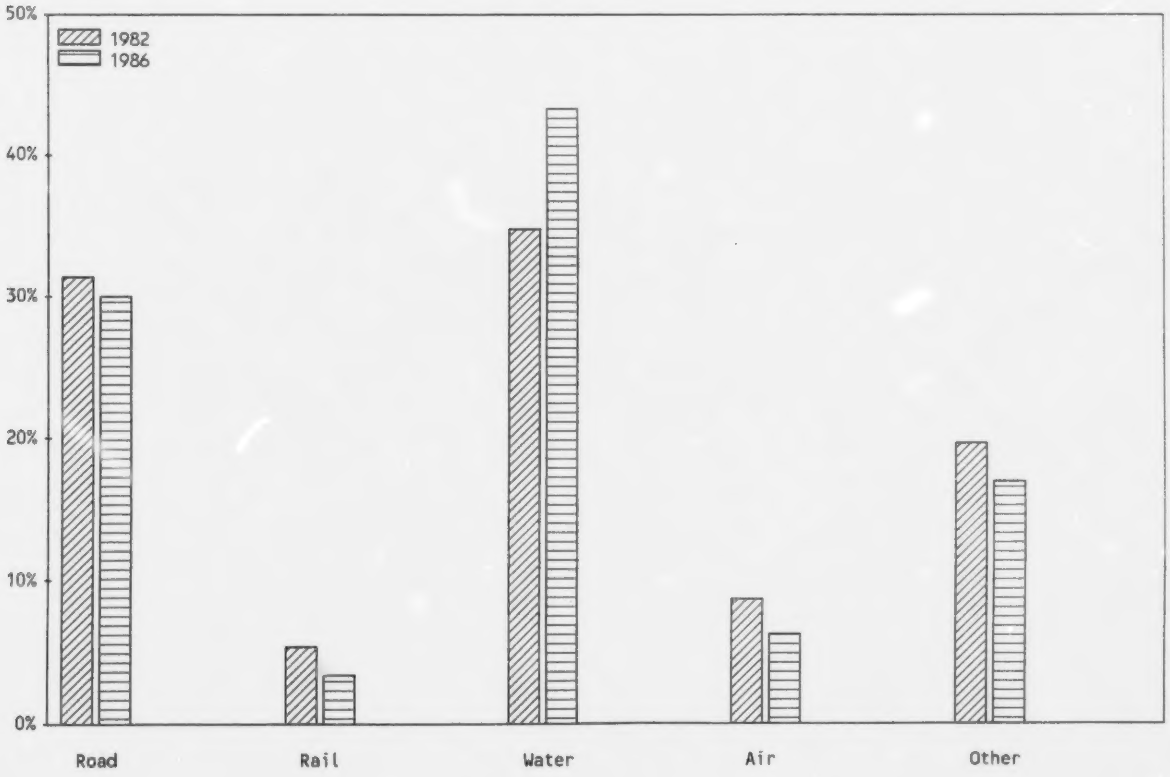
CANADIAN IMPORTS CLEARED THROUGH B.C. CUSTOM PORTS
Mode of Transport 1982 and 1986



EXPORTS BY DETAILED COMMODITY BY COUNTRY

NOTE:

B.C. exports by detailed commodity and country are available only as 'origin/lading' statistics. While almost all of B.C. origin/lading exports are of B.C. origin, they also include some exports laden in B.C. but not of B.C. origin and exclude some goods of B.C. origin that were laden for export in other provinces. Exports of purely B.C. Products presented in Table 1, are not available for the full range of export commodities or by country.

IMPORTS BY DETAILED COMMODITY
BY COUNTRY

NOTE:

No comprehensive statistics are available for imports consumed in B.C. Import statistics presented in this publication refer to Canadian imports cleared through B.C. customs ports.

Canadian imports cleared through B.C. customs ports are not generally useful as indicators of import consumption in the provincial economy. However they do offer useful indicators of import shipping activity and can suggest import replacement opportunities.
